

SPA CARE MADE EASY - BACKYARD GETAWAYS INC

FILLING PROCEDURE FOR A WORRY-FREE SPA

1. Add 30 ml of SPA STAIN CONTROL per 1,000 of spa water.
2. Once filling is complete, add 1 pouch of SPA S.W.A.T.
3. Once water has reached desired temperature, add 150g of SPA JAZZ to soften water and increase comfort.
4. Adjust alkalinity using SPA ALKALINITY or SPA ALKALINITY MINUS.
5. Wait 4 to 6 hours, test and adjust pH as necessary with SPA PLUS or SPA MINUS.
6. Wait one hour, adjust calcium hardness with SPA CALCIUM.
7. Add the initial dose of 125ml of SPA ACTIVE #1 and 125g of SPA ACTIVE #2 PER 1,000 L directly into the spa water.

DAILY MAINTENANCE

1. Check sanitizer. Add SPA ACTIVE #2 as necessary to ensure a sanitizer reading of 3-5 ppm.

WEEKLY MAINTENANCE

1. Check pH and Alkalinity. Adjust parameters if necessary.
2. Add the following recommended maintenance products.

SPA STAIN CONTROL	15 ml / 1,000 L of water	Prevents scaling and corrosion
SPA ZYME	75 ml / 1,000 L of water	Eliminates oils, water marks and odors
SPA JAZZ	40 g / 1,000 L of water	For Silky soft skin and optimizes sanitizer
SPA ACTIVE #1	30 ml / 1,000 L of water	Ensures a sanitizer reading for 3-5 ppm

3. Wait 24 hours then add:

SPA S.W.A.T.	1 X 40 g pouch / 1,7000 L of water	Eliminates cholramines and clarifies water
--------------	------------------------------------	--

RECOMMENDATIONS

AFTER EACH USE: Add 1 tbsp. of SPA ACTIVE #2 per bather to ensure clear and safe water (max 4 tbsp)

EACH TIME SPA IS DRAINED: Use SPA CAL and SPA SLIP to clean the spa. Use SPA BRIGHT to clean and protect the cover and SPA CONTACT to clean the cartridge once a month

ONCE PER MONTH: Ask for complete spa water analysis from your specialist
